

CANCER CONCIERGE

SRIKANTH NANDIRAJU

“ *The goal is to help PICl get more patient sample data with the patient's consent by providing expert opinion services around cancer immunotherapy.*

CANCER CONCIERGE

THE WORKFLOW

PATIENT

Patient signs up on the patient portal and gives consent and uploads medical data in a secure way to the platform

CURATOR

The curator sorts and organizes the patient data to make it easy for the expert to review in an efficient way.

ONCOLOGYST

A panel of immune oncology experts who will be reviewing the patient health data to provide an expert opinion

CANCER CONCIERGE

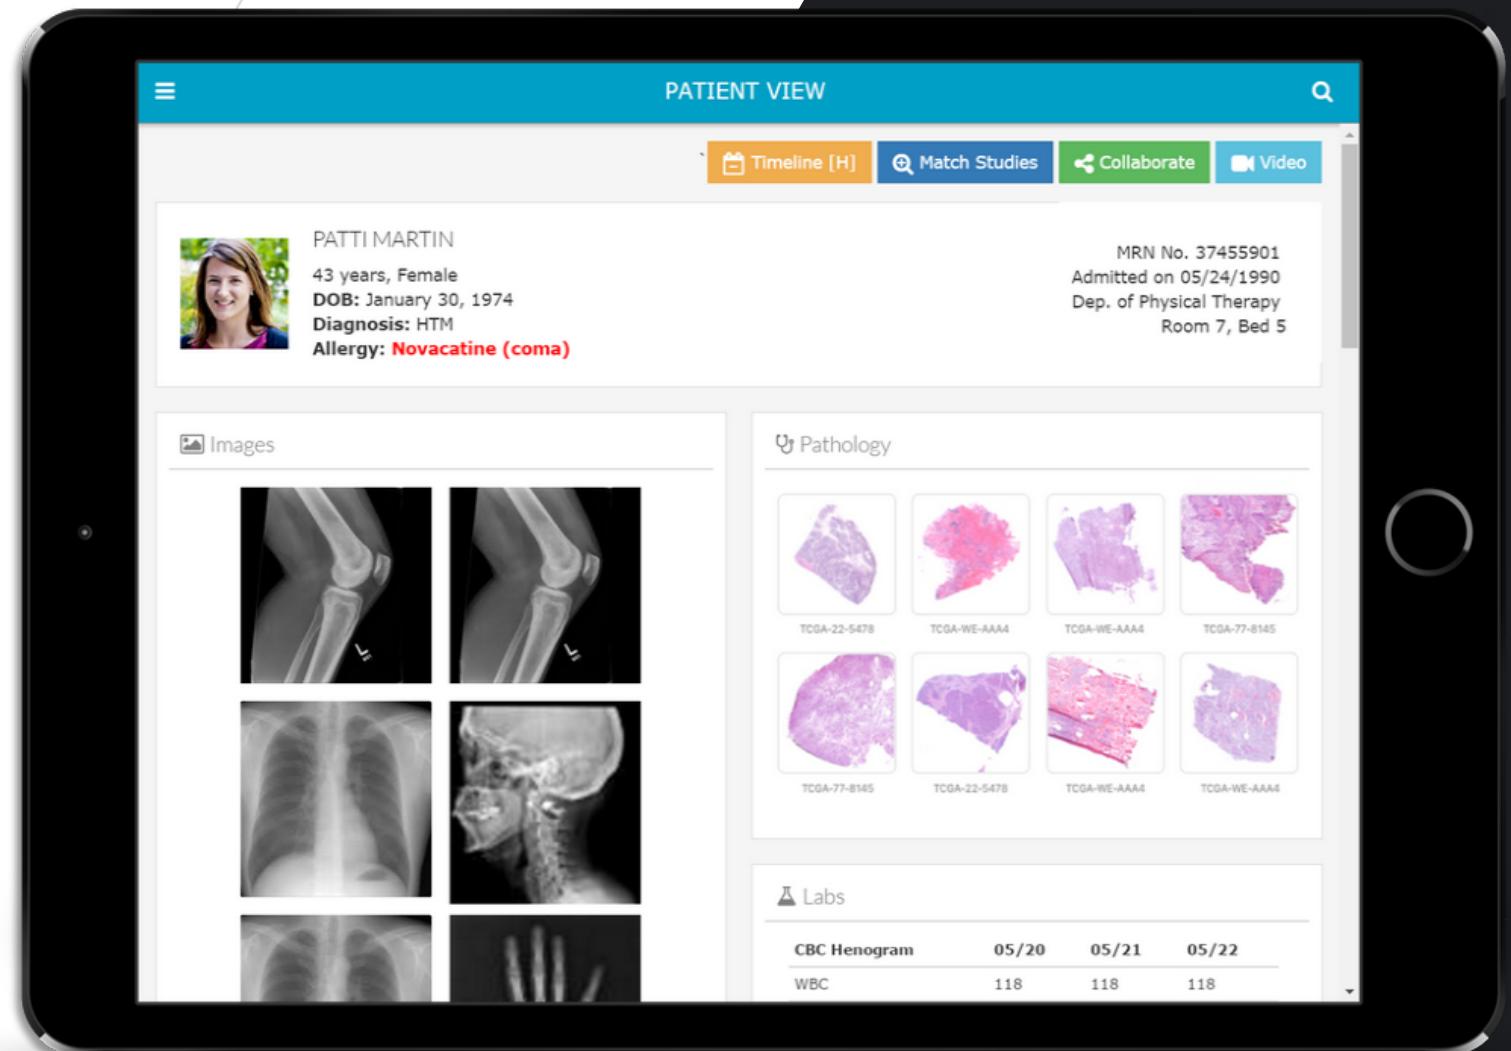

ONCOLOGIST ADVISORY SERVICES

TIMELINE VIEW

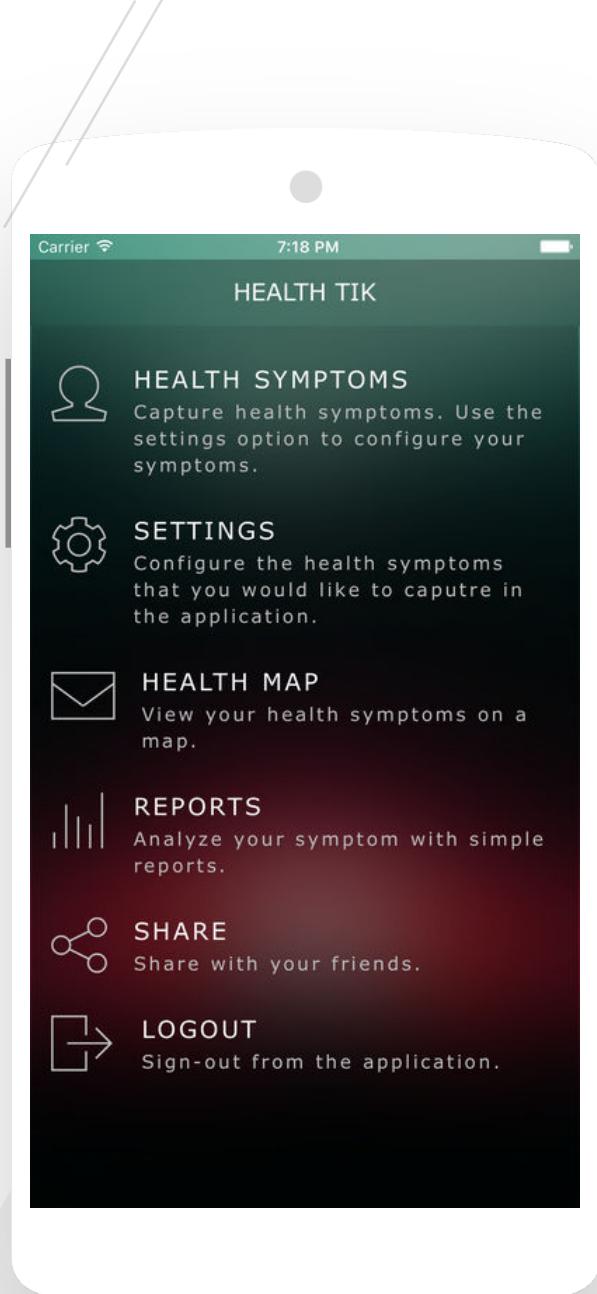

PATIENT ADVISORY **SERVICES**

- ✓ Maximize number of patients getting immunotherapy for their cancer
- ✓ Identify clinical trials relevant to a patients' stage and phase of disease for cancers where there is not yet an FDA approved indication or compendia listing (CTM)
- ✓ Identify providers we vet who are skilled at immunotherapy for non clinical trials (where most of the patients are treated)
- ✓ Match patients to oncology providers who are versed in treating with immuno-oncology within close proximity of a patient's zip code

CANCER CONCIERGE

PATIENT ENGAGEMENT SERVICES

A mobile companion app for the patients to help them upload real-time data

- Take data about patient reported outcomes and transmit it to the "care team" of nurse and oncologist on an ongoing basis - in advance of their meeting
- Patient education: video feeds to the patients explaining immunotherapy, management of side effects
- CCM support (Chronic care management)
- On-line Electronic Consent for General Research (GRC)
